01 — FOUNDATIONS

Brand at a glance

Ware Plumbing is a family-run business serving Melbourne's South East for 30+ years. The brand should feel reliable, professional, and approachable — clean and calm rather than loud and cluttered, which is how most trade websites read.

Positioning

Your trusted choice for all plumbing works. Reliable. Professional. Unmatched. The visual system carries that promise through generous whitespace, a confident single accent colour, and friendly line-based illustration.

Design principles

Trust through clarity

Whitespace and a tight type hierarchy signal competence. Never crowd the page to fit more in.

One confident accent

A single blue does all the lifting — links, key icons, primary actions. Restraint reads as premium.

Calm, not corporate

Rounded corners, soft shadows and human illustration keep it warm and family-run, not sterile.

Action-ready

Phone, booking and "Get in touch" are always within reach. The design serves conversion.

Logo usage

The monogram pairs a bold "W" with a blue "G" lockup. Keep clear space equal to the height of the "W" on all sides.

Minimum size 28px digital. Use the all-ink version on light backgrounds and a reversed white version on the dark ink background.

Note: The monogram shown reflects the reference mark. If a final Ware Plumbing logo exists, swap it in and keep these clear-space and colour rules.

02 — COLOUR

Colour palette

A neutral base of ink and white carries the system; a single saturated blue is the accent. Keep accent use deliberate — primary buttons, links, and one focal icon per view.

Core

Ink
#16181D
Headlines, body text, dark sections, logo.

Brand Blue
#2D7FF9
Primary actions, links, focal accent icon.

Neutrals

Ink Soft
#3A3F4A

Grey
#6B7280

Line

Usage ratio & accessibility

ROLE	COLOUR	APPROX. COVERAGE
Background / surface	`#FFFFFF` / `#F5F6F8`	~70%
Text & structure	`#16181D` / greys	~25%
Accent (blue)	`#2D7FF9`	~5%

Ink on white and white on blue both exceed WCAG AA contrast for body text. Avoid grey `#6B7280` for text smaller than 14px on white; use Ink Soft instead.

Typography

A single geometric sans-serif covers the whole system. Big, tight, bold headlines paired with calm regular-weight body text create the modern, confident hierarchy from the reference.

Typeface

Primary: **Inter** (free, Google Fonts). Excellent alternatives with the same character: **General Sans** or **Satoshi**. Use one family across the entire site. System fallback stack: `Inter, -apple-system, "Helvetica Neue", Arial, sans-serif`.

Type scale

All plumbing works.	Display · 48px Weight 800 · -1.5px
Your trusted choice	H1 · 36px Weight 800 · -1px
Prompt & reliable service	H2 · 28px Weight 700 · -.5px
Why choose Ware Plumbing	H3 · 20px Weight 700
Reliable, professional plumbing for Melbourne's South East — body copy sits at a comfortable reading size.	Body · 16px Weight 400 · 1.5 lh
Captions, labels, fine print and metadata use the small size in grey.	Small · 13px Weight 400

Rules

Do

- Keep headlines tight (negative letter-spacing) and bold.
- Stack hero headlines on two short lines like the reference.
- Use sentence case for headings and buttons.
- Limit body line length to ~70 characters.

Don't

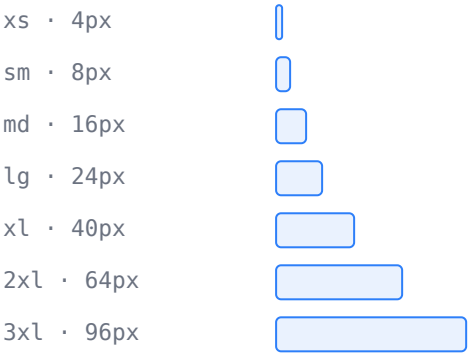

- Use ALL CAPS for long copy (dated trade look).
- Mix a second display typeface.
- Centre long paragraphs — only short hero text.
- Go below 13px for any readable text.

04 — LAYOUT

Spacing, radius & elevation

Generous, consistent spacing is the single biggest driver of the "trustworthy and clean" feeling. The system is built on a 4px base unit.

Spacing scale (4px base)

Corner radius

`8px`
Buttons, fields, small cards

`12px`
Cards, containers

`pill`
Nav button, tags

Elevation

`sm`

`md`

`lg`

Grid & container

TOKEN	VALUE	NOTES
Max container	`1200px`	Centred, with 24px side gutters on mobile
Columns	`12`	24px gutter desktop, 16px mobile
Section padding	`96px` top/bottom	64px on tablet, 40px on mobile

05 — COMPONENTS

Core components

Reusable building blocks styled from the foundations. Each uses the spacing scale, 8–12px radius, and the single blue accent.

Buttons

Get in touch Our services Let's fix your problem ›

VARIANT	USE	STYLE
Primary	Main action: book, call, contact	Blue fill, white text, 8px radius
Outline	Secondary action	White fill, line border, ink text
Ghost / link	Inline CTA with chevron	Blue text, no fill — the hero CTA style

Navigation bar

WG Home About Us Services Get In Touch

Wordmark left · centred links · outlined pill action right. Sticky on scroll with a subtle bottom border once the page moves.

Service card

Blocked Drains

Fast clearing of blocked drains and pipes.

Hot Water

Repair and install of all hot water systems.

Gas Fitting

Licensed gas fitting and leak detection.

Forms & booking

The contact and booking flow is the conversion core of the site. Keep fields large, calm and clearly labelled, with one primary blue action.

STATE	STYLE
Default	White fill, `#E6E8EC` border, 8px radius, 12–14px padding
Focus	Blue border `#2D7FF9` + 3px blue tint ring
Error	Red border `#E5484D`, red helper text below
Success	Green check, green border on validated submit

Trust / contact block

Call now

03 9790 5550

We're ready to help across Melbourne's South East.

30+ years

Family-run and trusted by the Dandenong, Berwick, Narre Warren and Cranbourne communities.

Booking integration: When the booking system is finalised, embed it inside the form container style above so it inherits radius, spacing and the blue primary action — the widget should feel native, not bolted on.

06 — IMAGERY

Iconography & illustration

Line-based illustration with one filled accent element is the signature look — like the reference's grey pipes framing a single blue icon. It keeps the brand friendly and modern.

Icon style

ATTRIBUTE	SPEC
Style	Outline / line icons, rounded joins
Stroke	1.75–2px, consistent across the set
Default colour	Ink `#16181D` or grey for decorative
Accent	Blue `#2D7FF9` for the one focal icon per view
Recommended set	Lucide or Phosphor (both free, consistent line style)

Illustration approach

Do

- Use light-grey line art for pipes, fixtures, scenes.
- Highlight a single element in brand blue as the focal point.
- Keep backgrounds white or surface-grey.
- Use real, warm photography for the team / about section.

Don't

- Use clip-art or heavily coloured stock graphics.
- Add multiple competing accent colours.
- Use dated drop-shadowed 3D icons.
- Overlay text on busy photos without a scrim.

Photography

Natural light, genuine workmanship, clean framing. Slightly warm tone to stay human and local. Avoid overly staged stock imagery — authenticity reinforces the 30-year family-run story.

07 — HANDOFF
